Prime Obsession Bernhard Riemann And

Georg Friedrich Bernhard Riemann (German: [ʁeːfʁiːdʁɪç ˈbɛʁnhart ˈʁiːman] (); 17 September 1826 – 20 July 1866) was a German mathematician who made contributions to analysis, number theory, and differential geometry. In the field of real analysis, he is mostly known for the first rigorous formulation of the integral, the Riemann integral, and his work on Fourier series.

En mathématiques, l'hypothèse de Riemann est une conjecture formulée en 1859 par le mathématicien allemand Bernhard Riemann. Elle dit que les zéros non triviaux de la fonction zêta de Riemann ont tous pour partie réelle $1/2$. Sa démonstration améliorerait la connaissance de la répartition des nombres premiers.. Cette conjecture constitue l'un des problèmes non résolus les plus ...

In de getaltheorie, een deelgebied van de wiskunde, impliceert de Riemann-hypothese (RH) of het Riemann-vermoeden resultaten over de verdeling van de priemgetallen. Het vermoeden werd in 1859 door Bernhard Riemann geformuleerd. Het vermoeden houdt in dat het reële deel van alle niet-triviale nulpunten van de Riemann-zèta-functie gelijk is aan $1/2$. Wat dit precies betekent, wordt in dit ...

Hypothese ist eine Annahme über die Nullstellen der Riemannsches Zetafunktion. Sie wurde 1859 von Bernhard Riemann in seiner Arbeit Über die Anzahl der Primzahlen unter einer gegebenen Größe formuliert. Es ist bekannt und bewiesen, dass die Zetafunktion reelle Nullstellen $\frac{1}{2}, \frac{1}{2}, \frac{1}{2}, \dots$ hat (die sogenannten „trivialen“ Nullstellen), sowie ...

Pythagoras (569–475 BC) is recognized as the world's first mathematician. He was born on the island of Samos and was thought to study with Thales and Anaximander (recognized as the first western philosophers). Pythagoras believed that numbers were not only the way to truth, but truth itself. Through mathematics, one could attain harmony and live an easier life.
