[RegCNET] ERA5 Interface

We have finally decided to tag final version of RegCM 4.4.0. It is out, and we anticipate that before switching on RegCM 5.0 with new SISLDG dynamical core, we are currently working on adding MM5 non hydrostatic core to RegCM to have an intermediate 4 release with this new feature.

The first generation NCAR RegCM was built upon the NCAR-Pennsylvania State University (PSU) Mesoscale Model version 4 (MM4) in the late 1980s (Dickinson et al., 1989; Giorgi, 1989). The dynamical component of the model originated from the MM4, which is a compressible, finite difference model with hydrostatic balance and vertical σ -coordinates.
